Product Snapshot

Indicative Terms

Structure:

Underlying: The S&P 500® Index (Bloomberg: SPX <INDEX>)

Maturity: December 5*, 2008

Return Barrier: 20%Buffer Level: 10%

Rebate: 5.5% – 7.5% (to be determined on the Trade Date) **Downside Risk:** One-for-one downside participation with 10% Buffer

Positioning:

• Equity alternative that facilitates a moderately bullish view on the Underlying Index.

• Fixed income return in the form of the Rebate in the event the Index Barrier is breached.

Best Case Scenario:

• Investors will receive a return of their initial investment *multiplied* by the Index Return paid at maturity up to and including the Index Barrier.

Worst Case Scenario:

- 10% of the initial investment in the securities is protected at maturity by the Buffer Level.
- If the Index declines below the Initial Level by more than the Buffer Level, an investment in the securities may decline by 1% for every 1% decline in the Underlying below the Buffer Level of 10%.
- Maximum loss is 90% of the initial investment, subject to the credit of the Issuer.

Risk Considerations:

- Because the securities are not 100% principal protected, and the return on the securities is linked to the performance of the Underlying Index, investors may lose up to 90% of their initial investment.
- Return on the securities is linked to the value of the Underlying Index (without taking into consideration the value of dividends paid on the component stocks underlying such Index).
- An investment in the securities is subject to the credit of the Issuer.

Investing in the securities involves a number of risks. See "Selected Risk Factors" in this product snapshot, "Selected Risk Considerations" in the accompanying term sheet and "Risk Factors" in the accompanying product supplement.

Hypothetical Scenario Analysis at Maturity:

- Hypothetical scenario analysis contained herein does not reflect the reinvestment of dividends and does not reflect advisory fees, brokerage or other commissions, or any other expenses an investor may incur in connection with the securities.
- No representation is made that any trading strategy or account will, or is likely to, achieve results similar to those shown. Hypothetical results are neither an indicator nor guarantee of future returns. Actual results will vary, perhaps materially, from the analysis below.

The table below illustrates the payment at maturity per \$1,000 security face amount for a hypothetical range of performance for the Index from -100% to +100% in the case where the Index closing level was not greater than the Index Barrier on any trading day during the Observation Period and in the case where the Index closing level was greater than the Index Barrier on at least one trading day during the Observation Period.

The following results are based solely on the hypothetical example cited and assume an Initial Level of 1531.02 and Rebate of 6.5% (the actual Initial Level and the Rebate will be determined on the Trade Date). You should consider carefully whether the securities are suitable to your investment goals. The numbers appearing in the table below and in the hypothetical examples that follow have been rounded for ease of analysis.

Selected Risk Factors

- YOUR INVESTMENT IN THE SECURITIES MAY RESULT IN A LOSS Your investment will be
 exposed to any decline in the Final Level, as compared to the Initial Level, beyond the 10% Buffer
 Level. Accordingly, you could lose up to \$900 for each \$1,000 security face amount that you
 invest.
- CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE SECURITIES PRIOR TO MATURITY The original issue price of the securities includes the agents' commission and the cost of hedging our obligations under the securities through one or more of our affiliates. As a result, the price, if any, at which Deutsche Bank AG or its affiliates will be willing to purchase securities from you prior to maturity in secondary market transactions, if at all, will likely be lower than the original issue price, and any such sale prior to the Maturity Date could result in a substantial loss to you.
- NO COUPON OR DIVIDEND PAYMENTS OR VOTING RIGHTS As a holder of the securities, you will not receive coupon payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the component stocks underlying the Index would have.
- **LACK OF LIQUIDITY** The securities will not be listed on any securities exchange. Deutsche Bank AG or its affiliates intend to offer to purchase the securities in the secondary market but are not required to do so and may cease such market-making activities at any time.
- WE AND OUR AFFILIATES AND AGENTS MAY PUBLISH RESEARCH, EXPRESS OPINIONS
 OR PROVIDE RECOMMENDATIONS THAT ARE INCONSISTENT WITH INVESTING IN OR
 HOLDING THE SECURITIES. ANY SUCH RESEARCH, OPINIONS OR RECOMMENDATIONS
 COULD AFFECT THE LEVEL OF THE INDEX TO WHICH THE SECURITIES ARE LINKED OR
 THE MARKET VALUE OF THE SECURITIES.

- **POTENTIAL CONFLICTS** We and our affiliates play a variety of roles in connection with the issuance of the securities, including acting as calculation agent and hedging our obligations under the securities. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the securities.
- MANY ECONOMIC AND MARKET FACTORS WILL AFFECT THE VALUE OF THE
 SECURITIES In addition to the level of the Index on any day, the value of the securities will be
 affected by a number of complex and interrelated economic and market factors that may either
 offset or magnify each other.
- THE U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN THE SECURITIES ARE UNCLEAR There is no direct legal authority regarding the proper U.S. tax treatment of the securities, and we do not plan to request a ruling from the IRS. Consequently, significant aspects of the tax treatment of the securities are uncertain and no assurance can be given that the IRS or a court will agree with the treatment described herein. If the IRS were successful in asserting an alternative treatment for the securities, the timing and/or character of income thereon might differ materially and adversely from the description herein. You should consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the securities (including alternative treatments), as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction. Please read carefully the section of the accompanying product supplement entitled "Certain U.S. Federal Income Tax Consequences."
